Education

Vidya Academy of Science and Technology *Thrissur, India*

B.Tech in Computer Science 2016 – 2020

Work Experience

Senior Software Engineer Aug 2024 – Present

Experion Technologies

Kochi, India

- Lead full-stack delivery of large-scale enterprise applications on React (Next.js), NestJS and MongoDB serving 4 million users, owning architecture and code-quality standards.
- Designed automated report-generation pipeline that cut load time and saved hours by 60%.
- Introduced AI-assisted development (Claude Code agents, prompt templates) into the team workflow, reducing review time and boilerplate effort by 80%.
- Created an agentic workflow with multiple sub-agents for different phases of the development process (from initiation to deployment).
- Mentored junior engineers and ran code reviews.
- Actively involved with client discussions on a daily basis to gather requirements on latest feature enhancements and additions in order to convert business requirements into deliverable features.

React · NestJS · Next.js · MongoDB · Azure DevOps

Software Engineer Apr 2024 – Aug 2024

Orion Innovations

Kochi, India

- Built client-facing features in React, TypeScript and Node.js for financial audit applications.
- Integrated React best practices and improved page load time by 30% through code splitting and memoization techniques.

React · TypeScript · Node.js · Vue.js · Azure DevOps

Software Engineer II Feb 2023 – Mar 2024

Infoniz Technologies

Kochi, India

- Shipped complete production features across React.js, .NET APIs and MySQL in web app for a legal-sector client in UAE.
- Designed and architected frontend decisions and created reusable components, thus improving frontend performance significantly.
- Built a reusable, accessible component library adopted across multiple screens in the application.

React · Redux Toolkit · React-hook-forms · Material UI · Azure DevOps

Software Engineer Aug 2022 – Dec 2022

Repustar

Remote

- Frontend for a fact-checking platform in React, Next.js and TypeScript.
- Implemented UI screens and functionalities for a fact check bot which implemented fact checking across multiple social media platforms(X, Instagram .etc.)

React · Next.js · TypeScript

Junior Front-End Engineer Oct 2021 – Aug 2022

Reveation Labs

Ahmedabad, India

- React and Vue based SPA features built with precision for multiple products.
- Implemented Fluu fledged serverless application for consumer services using Firebase and Nuxt.js
- Worked on a blockchain based NFT marketplace platform which was created using Nuxt.js and Solana(Blockchain).

React · Vue · Nuxt.js · Next.js · Firebase

Freelance Web Developer Jan 2020 – Oct 2021

Freelance Web Developer

Kerala, India

- Delivered multiple full-stack projects (React, Node.js, Firebase) for startup restaurants and businesses, owning scope, build and deployment.

React · Node.js · Firebase

Projects

AI Resume Tailor

- LLM-powered app that scores a resume against a job description, runs keyword-gap analysis and rewrites it with before/after ATS scores, inline editing and export.

React · Claude API

Motorcycle Marketplace Platform

- Architected a microservice marketplace with independently deployable micro-frontends and backend services; designed Razorpay checkout with webhook-driven order fulfilment.
- Built an agentic development workflow (Claude Code, CLAUDE.md, custom Dev agent) to speed up feature delivery.

Next.js · NestJS · MongoDB · Azure

Skills

Languages: JavaScript, TypeScript, Python

Libraries & Frameworks: React, Next.js, NestJS, Zustand, Angular, Vue.js, GraphQL

Tools: Redux, MongoDB, PostgreSQL, MySQL, AWS, Firebase, Git, Supabase, GitHub

Methodologies: Code Review, Prompt Engineering, Agile, Scrum, Object-Oriented Programming (OOP), Continuous Integration/Continuous Delivery (CI/CD)

Soft Skills: Mentoring, Client Communication

Additional skills: Ionic, Azure, CI/CD, microservices, REST, Claude API, LLM-powered features, agentic coding workflows, ElevenLabs TTS, voice cloning, Razorpay payments, third-party APIs, Remotion

Certificates

Python Full-Stack Developer Certification 2021

Profile

Senior Full-Stack & AI Engineer with 6+ years shipping production web platforms in React, Next.js, NestJS, TypeScript and MongoDB on Azure and AWS. I lead feature delivery end to end at Experion, from architecture and code review to mentoring engineers. I build LLM-powered products: an ATS resume-tailoring app on the Claude API, an automated AI video pipeline with voice cloning, and agentic coding workflows with Claude Code.
